

Magnifying Glass Kit Instructions

You will need:

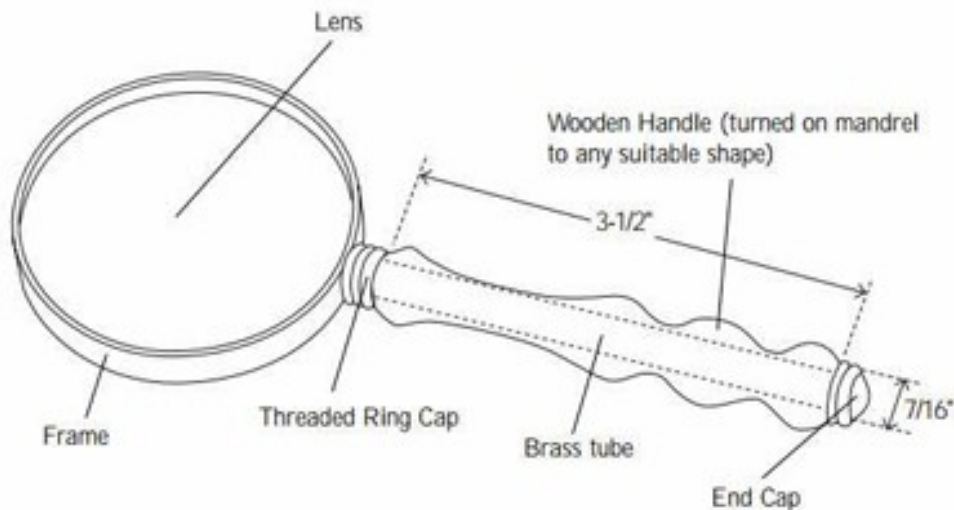

Drill bits: 7mm

Magnifying Glass Bushing

Drill, Tube & Square your blanks & mount on your mandrel

Turn your blank down to the bushings. Polish & finish blank

Lay out your parts based on the diagram below

Assembling the kit

1. Press the end cap into the bottom end of the handle.
2. Press the threaded ring cap into the opposite end.
3. Position the glass in the groove inside the frame.
4. Secure the frame and lens assembly and screw the stud into the threaded ring cap on the handle.
- Be careful not to over tighten, it may cause damage to the glass
5. Check to see that the glass is seated securely in the frame.
